

Why Use Red Raspberry Seed Oil?

Red Raspberry Seed Oil is unique because it contains high levels of Vitamin E in the form of alpha-tocopherol and gamma-tocopherol, which are the most active form of Vitamin E to protect your skin. As a result, Ingredients To Die For Red Raspberry Seed Oil also protects from damaging UV-A and UV-B rays. In addition to high concentrations of mixed tocopherols (Vitamin E), it contains carotenoides (Vitamin A).

Red Raspberry Seed Oil is known especially for its prevention of gingivitis, rash, eczema, and other skin lesions. Its use as a cosmetic is based in parts on its anti-inflammatory activities, which is superior when compared to those of other well-known pressed oils making it the perfect choice for cosmeceutical / nuriceutical application. A must have for after sun products and damaged skin preparations.

Recent studies of red raspberry seeds by Canadian researchers (Oomah et al 2000) show that the most abundant fatty acids found in raspberry oil are linoleic, alpha-linolenic, and oleic acids. The composition of omega-3 and omega-6 fatty acids is one that research shows reduces the effects of oxidative stress (damage) in skin. In addition to abundant fatty acids, red raspberry seed extractions are a very rich source of alpha-tocopherol (E-306) and gamma-tocopherol (E-308). This tocopherol (Vitamin E) rich composition has a well known function in skin repair and conditioning, which is related to antioxidant properties.
